

## Collaborating with Solstice™ Software: Key Features and Benefits

### Challenge

You're considering Solstice visual collaboration software to bring more effectiveness and engagement to your meetings or classrooms. What are the key benefits offered by this solution?

### Solution

Solstice is an enterprise-class solution loaded with robust features designed to leverage today's technology trends to cost-effectively improve collaboration. In brief, these include:

- Broad support enabling content sharing for unlimited users and unlimited posts using any individual Windows, Apple, or mobile device for Android™
- Connectivity via existing WiFi/Ethernet network – no cables needed
- Leverages existing equipment – no proprietary hardware needed
- Easy installation on standard Windows PCs, connected to any display/projector with support for any resolution
- 45-second meeting/class start up via free Solstice app or access key
- Rich, virtually unlimited content sharing with synchronized audio
- Customizable drag and drop, user-controlled screen layout
- Access control with multiple use modes for security and efficiency
- Future-proof software architecture with one-click software updates
- Ultra-low latency for minimal delay between client devices & display
- Display naming and discovery for compliant network traffic routing
- Numerous network security and flexibility features including standard TCP/IP traffic and configurable base ports
- Centralized management to support, configure and manage up to hundreds of Solstice displays
- PC-less Solstice Pod™ option – turnkey solution combining Solstice software with a cost-effective, high-performance hardware platform

What you'll need to leverage your existing display technology and individual mobile devices for effective collaboration:

- ▶ Solstice software installed on a Windows 7, 8 or 10 PC and connected to a large format display, multi-touch display or projector to collaborate over existing WiFi/Ethernet networks

OR

- ▶ The Solstice Pod for turnkey wireless collaboration in rooms without a dedicated PC

PLUS

- ▶ Free Solstice app downloaded to student/instructor devices
